Product assessments

The products were assessments were based on BS EN 149:2001+A1:2009, the English language version of EN 149:2001+A1:2009, respiratory protective devices – filtering half masks to protect against particles, both documents incorporating Corrigendum dated July 2002.

Product description

The mask is designed to protect against particles and non-oil based airborne contaminants. The design incorporates an aluminium nose wire, single exhalation valve and an internal layer bonded with carbon. Retention is by means of two straps that loop behind the user's ears. A user fitted, length adjustable, auxiliary strap can be attached to the ear loops to enhance the retention system.
